

# Coronavirus: the situation in Russia

Many readers asked us how about Covid-19 in Russia. We can afford just now such informations. As well wrote today *Interfax* there were yesterday “another 8,840 cases of infection with a new type of coronavirus infection were detected in the Russian Federation per day”.

*During this period, 398 people died. The total number of victims of COVID-19 in the country has reached 107,501. 4.37 million patients recovered and were discharged, including 9,407 per day.*

New episodes were recorded in 84 regions of the Russian Federation. In Moscow, the daily increase was 2502. In St. Petersburg the new cases were 694, in the Moscow region – 609.

The smallest values were recorded in Tuva – two, one each – in the Jewish Autonomous District and the Chukotka Autonomous District. Not a single sick person per day in the Nenets Autonomous District.

*Since the beginning of the spread of coronavirus in the Russian Federation, since March 2, 2020, 4.74 million cases of infection have been registered. According to this indicator, Russia is in fifth place in the world”.*

In addition, The Gamaleya Center has released about 20 million doses of Sputnik V, 16 million have received first dose, and 3.8 million people have been vaccinated against coronavirus in two doses

till april 21.
